Product	Description	Liter		Brochure
CONCRETE COATING 	Concrete Coating is non permeable and protects concrete & masonry surfaces from water, chloride ion penetration, food & beverage acids, bird & animal waste, salt spray, and gum. Ideal for exterior concrete walls & structures, floors, masonry pavers, bricks, and cement blocks. Perfect solution for corrosion, prevention, moisture intrusion, efflorescence, mild acids, bird & animal waste, and hydrocarbon protection.	20-199		Link
		200-499		
		500-999		
		1000+		
METAL COATING 	Metal Coatings is a durable and long-lasting nano-based clear coating designed to protect all metal surfaces from various destructive forces. It provides superior resistance to rust, moisture, corrosion, salt spray, acid rain, UV damage, oxidation, galvanic corrosion, animal & bird waste damage. Metal Coating is peel and flake resistant, ensuring a long-lasting barrier against the elements.	20-199		Link

COOL REFLECT 	Cool Reflect RF Roof Coating is an innovative and cost-effective roofing solution that provides long-term protection against the harsh elements of the weather. The coating system is designed to reflect solar radiation and reduce the amount of heat absorbed by the building, leading to significant energy savings and maximum comfort. It is an ideal for commercial and industrial roofing applications, where durability and longevity are critical factors.	1-99		Link
		100-499		
		500+		
RUST REMOVAL 	Rust Removal is the perfect solution for removing rust and corrosion from metal surface. This light to medium duty rust remover is designed to penetrate deep into surface rust to help remove corroded areas.	1-99		Link
		100-499		
		500+

HYDROPHILIC/ HYDRPHOBIC GLASS COATING 	ThinTech Hydrophilic/ Hydrophobic Glass Coatings are versatile coatings suitable for use on commercial glass interior and exterior, solar panels, tiles.	1-99		Link
		100-499		
		500+		
WOOD COATING 	ThinTech Wood Coating is a water-based, non- film forming solution designed to provide superior protection for wood substrates. Engineered to prevent moisture intrusion and inhibit algae growth, this advanced coating maintains the natural appearance of your wood surfaces.	1-99		Link
		100-499		
		500+		

PRODUCT LIST

Product	Description	Liter		Brochure
INTUMESCENT COATING (2-component system) 	ThinTech Intumescent Coating is a cutting-edge, water-based fire retardant solution designed for ultimate fire protection. This clear coating can be applied to a variety of substrates, including wood, steel, plastic, and concrete, providing versatile and reliable safety. Include: Primer & Top-Coat	1-99		Link
		100-499		
		500+		
FRAME & RAIL COATING 	ThinTech Frame and Rail Coating is a premier water-based solution designed to protect and rejuvenate aluminum, stainless steel, bare or powder-coated window and door frames, handrails, trellises, fences, and aluminum siding.	1-99		Link
		100-499		
		500+
