# SIMULATORS

**"Invest in quality"**

AM Risk takes pride in our ARFF Mobile Training Simulators and full evolutions with 15 years plus training experience in this field we build ARFF evolutions with training methodology in mind.

The Mobile Simulators are designed so that the rescue firefighters experience is as close to real life scenarios. Our simulators are available in various configurations specifically designed for your needs.

Our Mobile ARFF simulators are build & constructed as follows:

- ❖ Pressure fed fuel (Jet A1)
- ❖ Built out of high tensile steel for longer life span.
- ❖ Protected with heat resistance paints
- ❖ Mocks can simulate – Dammed fuel
- ❖ High pressure fed pump
- ❖ Air trailer to transport simulator to site
- ❖ Protected shield for operator
- ❖ Emergency shut off
- ❖ Remote ignition
- ❖ Fully licensed and registered with national road transportation.

## Training

**"If you don't train them, you can't blame them"**

AM Risk is all about creating inspiring learning experiences for your employees. Its one thing to learn everything from a book but people learn and remember concepts rules and ideas far better when they are visually stimulated and involved with interactive training methods.

AM Risk is a South African Civil Aviation (SACAA) approved and a Local Government Sector Education Training Authority (LGSETA) accredited training organisation. Our training programmes in rescue and fire-fighting disciplines are based on the International Fire Service Training Association ("IFSTA") curricula that is also aligned with the international accepted National Fire Protection Agency ("NFPA") standards. Both IFSTA and the NFPA are leading world authorities on fire-fighting techniques, fire prevention and authoritative sources on fire safety. Our fire fighter training is based on the latest IFSTA manuals, including the Essentials of Fire Fighting (6<sup>th</sup> Edition). Following successful completion, students will be issued with an international standard fire fighter qualification certificate. Our Facilitators are registered NFPA 1041 Instructors.

With AM Risk its all about visual communication and practical learning its our vision for employees to learn in new and exciting ways. We believe it's an essential part of education.

Our aim:

- ❖ Improve internal communication
- ❖ Improve health and safety awareness
- ❖ Improve employee morale

**Invest in your employees and let AM Risk & Training tailor design your company's training needs and budget.**
